Federal Communications Commission  
445 12th St., SW  
Washington, DC 20554

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Dennis Rix

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Clare Brady

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Hildegard Nyberg

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Dana Collins

RE: MB Docket No. 14-57, Comcast-Time Warner merger

We need to get back to one man, one vote. Corporations are not people. And competition based on sustainable leadership concepts is essential. All are needed for a properly functioning democracy. The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward and to take compelling steps to get the US back a functioning democracy.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before; it could lead to decreased competition and higher Internet and cable costs for tens of millions of Americans - who already pay more for less than many other countries. Also, this unfortunate action would be a huge threat to the free and open nature of the Internet. The proposed merger is NOT in the public interest, and I urge you to stop it from moving forward.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

One giant media company could control the the media most of us see. We don't want that kind of mind control. We want freedom and especially freedom of thought. Hello? Is anybody out there? Does the government represent the people or only the corporations? NO MERGER PLEASE>

It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward. There are laws in place that need to be enforced... Congress passed the first antitrust law, the Sherman Act, in 1890 as a "comprehensive charter of economic liberty aimed at preserving free and unfettered competition as the rule of trade." In 1914, Congress passed two additional antitrust laws: the Federal Trade Commission Act, which created the FTC, and the Clayton Act. With some revisions, these are the three core federal antitrust laws still in effect today. For over 100 years, the antitrust laws have had the same basic objective: to protect the process of competition for the benefit of consumers, making sure there are strong incentives for businesses to operate efficiently, keep prices down, and keep quality up. Section 7 of the Clayton Act prohibits mergers and acquisitions where the effect "may be substantially to lessen competition, or to tend to create a monopoly." Follow the law.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

Each of these behemoths is already too big. For heaven's sake, don't let them merge! The simple solution is to recognize the reality that internet has become a public utility, just like phones. You need to declare it so.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Dr. Juliana Mazzeo

RE: MB Docket No. 14-57, Comcast-Time Warner merger

We know from our history the affect of monopolies and oligarchies on democracy. They destroy competition and innovation. Corporations and wealthy individuals are taking a larger share of the world's resources than ever before. If you want the economy to flourish, break up the 5 or 6 big media companies into 30 regional companies. Choice, price, employment, and corrupting influence on government will all shift in favor of the common citizen. That's the only way a market democracy can thrive. Corporate power must be separated. Congress will never change under the current circumstances because diluting corporate influence dilutes the funding of their seats.

Sincerely,

Kent Moore

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Ilse Andrews

RE: MB Docket No. 14-57, Comcast-Time Warner merger

This merger proposal reminds me of growing zucchini. Zucchini is one of those foods that has a middle range where they are excellent but when too small they are not good and when they get too large, they taste pulpy and blah. Media companies are very similar. Smaller ones may not survive because they are too small. The middle range gives them the ability to compete and yet be small enough to adapt to changing circumstances. Once they get beyond this middle sweet point, they become big and cumbersome and get in their own way when it comes to innovation. As discussed below, this merger is a very large pulpy zucchini. It may be really big but it tastes like \*&^%. The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

David Heslop

RE: MB Docket No. 14-57, Comcast-Time Warner merger

Don't allow this to happen - the consequences would be disastrous in ways that we cannot even comprehend. The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Washington, DC 20554

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Brian Licht

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

John Walsh

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Daniel Lanser

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward. My comment: The internet is, by now, an utility, not a privileged channel. All people need access to an inexpensive, free, open internet. This kind of merger can only accelerate the sclerotic chokehold of monopoly capitalism on all of us. We want STAKEHOLDER capitalism, and this won't help that cause at all.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The consolidation in the media industry over the last two decades has failed to serve the public interest both from a content and competition point of view. Diversity of opinion in media has been negatively affected and prices to consumers for content have not decreased. This merger will further perpetuate these problems and I am strongly opposed to it.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Dave Cowen

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

William R. Gaither

RE: MB Docket No. 14-57, Comcast-Time Warner merger

Comcast has a well-deserved reputation for providing horrendous customer service. I personally discontinued my cable service from Comcast after numerous frustrating encounters with incompetent and apparently uncaring customer service reps at Comcast. Now I understand the FCC is considering rewarding this unacceptable behavior by approving Comcast's purchase of TimeWarner Cable. The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Terry Wilson

RE: MB Docket No. 14-57, Comcast-Time Warner merger

A merger between Time Warner Cable and Comcast should not be permitted. It would create a competition-stifling media empire and lead to higher Internet and cable costs for consumers. It would also threaten the free and open nature of the Internet. This merger is not in the public interest and I urge you to stop it.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Mohan Malkani

RE: MB Docket No. 14-57, Comcast-Time Warner merger

It is absolutely WRONG to operate this country as if we have been transported to the "Outer Limits", where the worst of the worst "control all we see and hear", with half the country absorbing all the lies they wish to put out there, and the other half suffering the consequences. When 5 of the wealthiest men in the land, Alito, Scalia, Thomas, Roberts, and Kennedy, who all have financial interests in giving the wealthiest corporation owners the dubious "right" to lie to the people, as to the dangers of the products they sell, to poison the land, the water, the air, the food, to wipe out whole communities with exploding trains and factories, making the money men into devils, disguised as humans, something has to give. You have GOT TO stop this merger, NOW, and reinstate the Fairness Doctrine, along with tougher rules and real consequences for those who deliberately cause harm to America and HER people, all in the name of profits. The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

This is a bad idea all around. Consumers will have to slog through worse service, and costs are bound to rise, as competition is further discouraged. Furthermore it tightens up an already tight communications stream. This is what antitrust law was made to fight.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Barbara Zilles

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Andrew Ritter

RE: MB Docket No. 14-57, Comcast-Time Warner merger

Don't allow the monopolization of our ways of communication, this ever larger corporation in search of power for itself, not the interest of the people they serve. Stand up to the corporate take over of America by the power grabs of these corporations. That isn't in the interest of Americans, it is only in the interests of the rich, who have no need to hold sway over those they stole their riches from in the first place. Stand up for the people, not a lifeless power grab of our ability to freely communicate.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Hugo M

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Janis White

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Thomas E. Booker

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Ronald Oliveira

RE: MB Docket No. 14-57, Comcast-Time Warner merger

Please do all you can to halt the proposed merger of Comcast and TimeWarner. This much concentrated power over so many people cannot have a good result. When companies truly compete, the consumer may get a better deal, but when huge companies merge, competition is crushed and the giants abuse their power and influence. Please nip this in the bud now!

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Letitia A Mason

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Nancy McLure

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate, unlike anything we've seen before. It will certainly lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. In addition to the potential conflicts-of-interest in some geographic markets, this move would severely alter the balance of power that exists in the overall market, giving the Company almost complete control over any labor or service dispute. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge the Commission to stop it from moving forward.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

When companies merge and industries shrink, consumers lose and eventually, the economy suffers as well. This is detrimental to innovation and competition. If anything, both Comcast and Time Warner should be broken up instead of being allowed to merge. As a business executive, this merger is an incredible mistake.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans in a market where there are already too few players and would create a further conflict of interest as Comcast already owns program suppliers (Universal) and broadcasters (NBC and the associated cable properties). It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward. At the very least, if this is approved, Comcast should have to sell its interests in NBC and Universal.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Patricia Rodgers

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

William Bennett

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

Stop creating monopolies and companies that are too big to fail. Its bad for economic competition, bad for communication/information infrastructure advancement and security, and bad for america. But you fuck stick douch bags in the fcc wont listen or care because your getting paid off you sell out, unamerican, spineless, greedy, shortsighted mother fuckers. I hope you all die and suffer horribly for trading away america to corporations. FUCK YOU DIE FUCK YOU DIE FUCK YOU DIE FUCK YOU DIE FUCK YOU DIE DIE DIE DIE DIE DIE. Keep it up, wont be long till the public gets pushed too far and violatons of public trust will be treated and punished as treason in a citizens street court where no corrupt court officials or prosecuting attorneys will save you. The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward. Comcast and Time Warner Cable's stated justification of this merger is that it would not decrease competition, because they already handle their own respective areas in the country. That is effectively them stating that their merger is one which is already between two monopolies, it is not a viable argument.

These companies already have non-competitive access to cable lines, resulting lack of competition and price gauging. An example of such gauging is the limited viewing access to the Olympic Games in the U.S. compared to other countries around the world. Please decrease the hold of these monopolies and enable a competitive marketplace for these services. Thank you.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

Neither giant Comcast nor Time-Warner has proven to be a friend to its customers. Comcast, in particular, has shown a profit-conscious tendency to smother local news by homogenizing its reporting nationwide. Cable 'service' in the U.S. is a virtual monopoly already, a fact obvious to those of us who cannot afford to pay the current high (and steadily rising) costs for cable, and therefore have no choice but to do without it. The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we have seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. Those of us who cannot afford cable service need internet for many purposes, some of them life-enhancing and vital for supplemental income. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Washington, DC 20554

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

George Grimm

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

A merger between Comcast and Time Warner Cable would create a massive media conglomerate. What is needed in this country is more competition, not less. The benefits of free market competition depend on there being a significant number of competitors, yet this merger seeks to reduce this already shockingly small number further. Two companies will benefit from this merger, while everyone else will foot the bill for this decrease in efficiency and innovation resulting from gutting free market competition. If a corporation that wants the profits of Time Warner, or wants to create products competitive with those of Time Warner, there's a simple solution: THEY SHOULD BUILD A BETTER PRODUCT. Let Comcast raise its dismal performance so that it's no longer receiving awards like "Worst Company in America". (<http://tinyurl.com/odcyqyf> ) They should \*participate\* in the market, not buy out companies that build superior products just so they'll be free from having to compete with them. This anti-free market merger will lead to higher Internet and cable costs for tens of millions of Americans. We'll pay more so that they compete less; that is whole purpose of this merger to these two greedy companies. They propose a wealth transfer from the struggling poor and middle class to the upper class -- as if the wealth divide in this country was not big enough. Even Forbes has warned of the dangers of income inequality. It hurts everyone-- rich, poor, middle class. So this proposal will, in the end, hurt even the companies proposing it. The merger, with its reduced competition, would also be a huge threat to the free and open nature of the Internet. At what point will one company control everything we see and hear? Comcast has hired an army of lobbyists to push this merger through, because hiring an army of people to actually \*improve\* their company from "Worst Company in America" would require lots of -- you know, hard work. God forbid. The proposed merger is intended to defeat the interests of all Americans in order to help a wealthy few. Those who fight America's interests deserve to be defeated. Give them the defeat they deserve, rather than a reward for their greed and poor performance.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Andrew Huston

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Joy Williams

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Nick Hughes

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

Already Comcast is well known for it's extremely poor customer service in this, their original market, which from many years of interactions with their employees becomes a pattern that suggests a deliberate intent to prioritize some other corporate agenda over a superior customer experience. I am NOT SPEAKING ABOUT CONTENT but rather about the servicing of that content. I am not speaking about how quickly your phone call is answered but rather about the priorities of Comcast during the interaction.

Sincerely,

Charles Bartholomew

Washington, DC 20554

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Jamie Dallas  
2711 Boone Street

RE: MB Docket No. 14-57, Comcast-Time Warner merger

I've been a Comcast "customer" (victim?) and know how bad they are, even if their advertising says otherwise. The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

Allowing a single company, especially one with the horrible service record of Comcast, to take control of all media access for more than half of our country is a mistake...exactly the kind of mistake the FCC is responsible to stop. I would personally never use Comcast as a provider, but if this merger goes through, much of the United States will have no alternative. Please stop this from going through.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Larger corporations are unwieldy and are less responsive to the needs of consumers, not more. They care less about what they are doing to customers; care less about consumer needs; care less about fairness and what is right. This is a bad idea. Do not allow it!

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable will reward one of the worst industry players (Comcast) for bad behavior, and will impose on tens of millions of voters higher costs, lower quality service, and some of the worst customer support in the industry. The internet isn't simply an entertainment stream -- it is a vital business utility, and is the lifeblood of the IT industry and any company with a distributed workforce (a very large and growing segment of the business world). The proposed merger is a particularly serious threat to small businesses and entrepreneurs -- the engines of IT industry growth. Taxes come in many forms, and discriminatory utility access is one of them. I urge you to prevent the inevitable damage to consumer and business that this ill-conceived merger threatens, and stop the it from moving forward.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

As a dissatisfied former customer of Comcast, and as a citizen concerned about increasing corporate control of our economy and society, I strongly oppose the proposed merger between Comcast and Time Warner Cable. This merger would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It could also jeopardize free and open expression on the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Brian Gallentine

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Shaytu Schwandes

RE: MB Docket No. 14-57, Comcast-Time Warner merger

What happened to the antitrust laws that fostered competition and benefitted consumers? This merger represents all that's wrong with our corporate culture and the anticapitalist anticonsumer anti competition trend our congress employs to allow very few people to become obnoxiously, obscenely rich. You pass this and you're unAmerican

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Richard McCombs

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Schuyler Kent

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Chris Brewer

RE: MB Docket No. 14-57, Comcast-Time Warner merger

In the early seventies, I learned about the Sherman Antitrust Act. In the early eighties, "Ma" Bell was broken up because the Justice Department filed suit under the Sherman Antitrust Act, based on the fact that Bell had a monopoly. Suddenly there was competition, which is the American way, or so I've been told. Why then is the FCC going to allow this merger? Who runs my government? The FCC?

Sincerely,

Roberta Bushman

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

A Comcast and Time Warner merger would create a massive media conglomerate—dare we call it a monopoly?? The results certainly promise to be the same: decreased competition and higher costs for consumers. And no, it is not in the public interest. It would absolutely be a real threat to the free and open nature of the Internet that is driving economic growth and the global exchange of ideas. Please, do not allow this to move forward.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward. I live in NYC and unfortunately due to geography Time Warner is my only cable choice. They are the worst provider in this city. Merger with Comcast will totally predictably further decrease quality of service, degrade affordability of public access to the internet and all other services they touch. This merger produces an entity too large to be dealt with by market forces -- especially in an industry that enjoys way too many government perks.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Richard Rothstein

RE: MB Docket No. 14-57, Comcast-Time Warner merger

Even those trying to dismantle democracy permanently in the USA pay lip service to the fact that a free and unfettered press is a bedrock of democracy. Comcast and Time Warner Cable are both already massive media conglomerates (with dreadful track records in "serving" the communities they dominate. They are too big as it is, with dangerous levels of power over the flow of news and information. Merging the two would be a possibly fatal bullet wound in the ailing body of democracy in this country. On a personal level for tens of millions of Americans, such decreased competition and higher access costs. Your support of such a merger would be in direct opposition to all public interest. I urge you to stop it from moving forward, using all regulatory and legislative means. Should those have been exhausted, as the telecomms industry (like many others) has done such a good job of thwarting laws intended to regulate it, block the merger by issuing a rule that protect the United States and its people from such corporate ambition -- and collusion with regulators and lawmakers -- run amok. Insist on fulfilling your mandate. An important part of the future history of this deeply imperiled country is in YOUR hands. Be heroes. Do the right thing.

Sincerely,

Maura Stephens

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Mary Dean

RE: MB Docket No. 14-57, Comcast-Time Warner merger

RE:The proposed merger between Comcast and Time Warner Cable...It seems to be obvious that the result of such a merger would create an entity much larger than what is considered a reasonable size for any business interest. There must be some point at which a corporation becomes too large to be governed by normal market forces, making the public interest irrelevant to them. Isn't the purpose of government to represent the public interest in such matters? We have all seen the effects of these super massive corporate entities; removal of competition from the marketplace, manipulation of market pricing, suppression of wages and an overall decrease in the diversity of goods and services offered to the public. It is not anti capitalistic to regulate the size of corporate entities, it is a necessity in order to maintain a balance between market forces which is the very definition of capitalism. If someone lobbies in favor of such a merger with cries of "free market" or "capitalism" then they are cynically and disingenuously invoking the term and you should not heed their request. I urge you to consider the public interest when ruling on this merger. Thank You.

Sincerely,

Douglas Fabiano

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger of Time Warner with Comcast is not in the public interest. I urge you to stop it from moving forward. Unfortunately, these huge companies feel that their best interest is served by controlling what I see and hear daily. Remember when AT&T was THE telephone company? No one except for AT&T thought it was a good idea for a communications empire to have that much control over their lives. This is the same issue, decades later.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

ben Jochim

It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward. The Republicans have brought us monopolies whom charge what they can get away with. I ask that the Government do everything to protect the many and stop this merger. If anything they need to be broken up. Is it too late? Have we reached the point where monopolies become the government?

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable should be blocked. It would further undermine the already inadequate competitiveness of the isp and cable industries. Comcast and Time Warner Cable already have too much control of information content and distribution. The proposed merger will make a bad situation even worse.

Sincerely,

Barnet Wagman

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Leah Isaac

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Rhonda Mandato

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

JoAnn Haasler

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Holly Williams

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Diane Snow

RE: MB Docket No. 14-57, Comcast-Time Warner merger

I write again to express my continued opposition to the Comcast-TimeWarner proposal. The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Thomas Ruddy

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

A merger between Comcast and Time Warner Cable will create the biggest media conglomerate in history, lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It will diminish the free and open nature of the Internet. This proposed merger is clearly not in the public interest. I strongly urge you to stop it from moving forward.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

JD M David M Anderson

RE: MB Docket No. 14-57, Comcast-Time Warner merger

When we moved from one house to another a year ago, the transfer of my husband's secure computer codes was impossible to achieve for at least three weeks. Comcast used it seemed tech. people in India to respond. They constantly started over, and left us on hold for hours at a time. It was the most frustrating experience. They do not allow local help, you have to use your phone. The larger Comcast gets, the greater the service loss, and higher the expense. The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Michael Ford

Comcast is easily the worst telecom/cable provider in the world. There are nightmare stories about their customer service. Time-Warner is also a huge megalithic piece of shit. So now they want to merge. They should both go fuck a pine cone and die.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Anne Olson

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Kristin Fletcher

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Sandy Beck

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Katrina Stimson

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

the internet is utility. my children need it for their homework. i need it to fill out forms daily. if you make comcast bigger, you will increase the divide between the rich & the poor. surely you do not want to compromise democracy.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Richard Rheder

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

Monopolies which is exactly what Comcast--Time Warner merger would become would take away competition, drive up prices for the consumers and allows the corporation to become a dictator in what kind of communications and networks will be shared and dictate terms of services for businesses operating on the internet. It is directly contrary to what America was founded on-- access to freedom of speech and an equal playing field for doing business. Monopolies are not held accountable by its consumers. Consumers do not have power to hold them accountable. This is what happened to many cities when Walmart came to town. I experienced this in my own home town. All other local businesses ceased to exist and citizens did not have any choice on where to shop or no way to support local businesses and keep the profits in the cities in which the profit was made. The merger of Comcast and Time Warner is the same thing--only even more dangerous because the internet is how we get information and how we can communicate and organize with each other. I also agree with the statement that has been prepared for people to submit for public comment: The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward. I also urge you to investigate monopoly practices already in practice by these two companies. They tried to defend their merger by claiming "we don't compete already, so this wouldn't be bad". This is a terrible situation we are in when two giant companies should be competing for each other's customer's business, but instead they have carved out areas where they each work. This has meant that consumers have been getting poor service for expensive rates because these companies are already too large and acting like monopolies.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. I am a Comcast customer who already rues the day I signed up. But, what do you do when they are the only act in town? They have NO competition in my part of town. The proposed merger is clearly not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Thomas R. Gutridge

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would be terrible for consumers. We are Comcast customers who have experienced repeated service problems over the past several years. It has most often taken many hours of persistent phone calls to a usually non-responsive customer service department to get any resolution. The ONLY time I've seen a complaint taken seriously by Comcast was this past week when our contract came up for renewal. Only after my husband told the Comcast rep that both internet service and television reception were too poor for us to consider renewing did Comcast attend to the problem. As less-than-satisfied customers, my husband and I are not alone. Friends have related nightmarish stories of very poor customer service, one requiring more than ten hours on the phone with a tech rep to set up continuation service after relocating to a new city. And that was after waiting several weeks to reinitiate service! The proposed merger would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward. Not everyone lives in an area where Xfinity or DISH or other forms of "cable" which aren't truly cabled exist. It has always been ridiculous that we have been stuck with a single source, depending on our address. EITHER Comcast OR Time Warner, never a choice. This removes ALL CHOICE and forces every American to subscribe to a company. This isn't a virtual monopoly. IT IS A MONOPOLY. This is why we have antitrust laws. Please, do not put us at the mercy of only having one provider which can then price their services as high as the wealthy can bear. We can barely afford our cable services now. I remember when a good range of services was a relative pittance--now it can be a week's net paycheck for a month of service that is no better. PLEASE STOP THE MADNESS.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Jorge DaCosta

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Paul D. Sinclair

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The citizens need open Internet., All info from the major media outlets is biased. We need access to alternative information in order to have critical knowledge. The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Aliaa Soliman

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before. This is not good society or individuals since monopolization leads to decreased competition and higher Internet and cable costs for tens of millions of Americans, impacting lower-income families and small businesses disproportionately. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Michelle Sichak

RE: MB Docket No. 14-57, Comcast-Time Warner merger

We used to have antitrust laws in America. What happened to them? Competition is good. Oligopoly is bad. Our country is failing because there is too much money chasing too few viable investment opportunities, and regulatory acts reducing competition only hasten our demise. I am forced to agree with venture capitalist Nick Hanauer: Pitchforks are on the horizon. I'd like to do whatever I can to delay that eventuality and as such, I must oppose this merger. But of course, we all know that you are all bought and paid-for, and my voice will be like a cry in the wilderness. The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Steven Boettcher

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Roger Vernon

Federal Communications Commission  
445 12th St., SW  
Washington, DC 20554

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Alan Myerson

Monopolies are illegal for a reason. 60% of the homes in America would be controlled by this conglomeration. This is too large of a majority. The FCC was put in place to protect Americans from this sort of thing. To keep free speech and the ability to access information in the hands of the people. It is the worldwide web. And as such it belongs to the people. Thank you.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward. Personal note: If, however, you were to classify Comcast and Time-Warner's ISP solutions as utilities, or common carriers, and regulate them as such PRIOR to any discussions about these two companies merging, i would find the merger to have some potential benefits, but again, that's only if Comcast starts to behave like a utility, which means some portion of its profits are reinvested in infrastructure and the like. I've grown more disgusted with Comcast's business practices over the years, raising the price of service but producing less in the way of truly worthwhile content. Now they want to create "lanes" for digital traffic to support their outdated, visionless business model. This is a company that can't even find the money to repaint the parking lines in its parking lot that have all but disappeared and can only be seen faintly right next to the curb! I made a point of mentioning it to the representative and he looked at me like I was annoying him with a trivial matter. It is NOT trivial to have the face of a company's business looking clean and well-maintained. Comcast does not DESERVE this merger, because they've fallen flat when it comes to basic business practices of overhead as it relates to maintenance and tying rate increases to visible improvements for its customer base. These are also excellent reasons for the FCC to step in and declare that the United States has a new utility: Internet service.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Mark Leicester

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Amanda Sheppard

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The most hated media companies merge to form one giant monopoly. Many customers have no choice of any other cable service provider. If they had even one alternative choice this could be called a free market. But as it stands this is just another mega monopoly that will lobby for further protection from competition. I urge the FCC to do \*anything\* to address this travesty of justice.

Sincerely,

Andrew Lyons

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Mr. Kerry Dietz

RE: MB Docket No. 14-57, Comcast-Time Warner merger

Comcast has a well-deserved reputation for treating its customers poorly. In fact, in an annual survey of consumers this spring, it topped Monsanto, Koch Industries and Verizon to be voted the “worst company in America.” We do not need this company spreading its lack of values across yet another organization, creating an unresponsive entity that would control media and Internet access for over 60% of U.S. households. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Michael Long

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Jen Wade

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

John Ford

Personal comment: \* \* \* Whatever happened to the notion of Free Enterprise versus MONOPOLY? No corporate entity should control such a large portion...especially when it involves such an important arena...communications! The Internet and all other media avenues need to stay free of such powerful ownership, or there will be potential for diminished freedom of speech and access to information...particularly for those who will be "priced out of reach" by constantly rising rates and/or fewer choices. PLEASE BLOCK THIS MERGER!

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Alex Kuretz

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The problems are: \*inevitable increase of costs to consumers, excluding some people from internet use at all. In this day an age when so many basic functions in life now presuppose broadband internet access (with this year's devices!), that is unacceptable,. \*the cost of these purchases always, in the end, comes out of the consumers' pockets, no matter what their accountants and lobbyists claim. \*eliminating competition allows service providers to get by with worse service. See above. \*Major telecomm companies are already charging way too much for poor service. Merging them cannot make this better. \*A majority stakeholder in internet and communications infrastructure has an enormous opportunity to censor and manipulate all communication, and all discourse. This is a direct threat to the basis of American democracy, and an attack on the constitution. FCC should be breaking up the telecomm industry, not helping it monopolize. The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Barbara Adler

RE: MB Docket No. 14-57, Comcast-Time Warner merger

I urge you to stop the proposed merger between Comcast and Time Warner Cable. It is a 'greedy' reach and not designed to be in the public interest as it would be a take over of mass proportion and create a destructive media conglomerate. A merger of this proportion would lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. Again, I urge you to stop it from moving forward.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. Comcast already has a horrible reputation; why should we feed such a repulsive, irresponsible beast? If you remember the days of the Bell Telephone System, you might remember the poster that read, "We don't care. We don't have to: we're the telephone company." Comcast's attitude is exactly the same. That disregard for individual enterprise would spill over into the Internet, disastrously impeding its competitive nature. I urge you to stop it from moving forward.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

Granting ownership of 60% of internet access across the country to Comcast would provide zero benefit to American consumers and tacit permission to discriminate in providing equal access to the internet to all Americans. It would also offer no incentive for Comcast to improve its poor service record. The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Jay & Sandra Klick

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Brett Frey

RE: MB Docket No. 14-57, Comcast-Time Warner merger

Comcast should not be allowed to buy Time-Warner. Consumers do not have any choices as it is when it comes to cable TV. And now this? Every year, like clockwork, Comcast raises its rates. Some of us can't afford even the "basic" cable rates. Why is it that Bell Telephone was seen as a monopoly and this isn't? Do not allow Comcast to merge with Time-Warner!

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Don Britt

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Tory Stephens

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Brian Donohue

Comcast is one of the worst corporations I've ever dealt with. As a previous customer I can't stress enough what a horrible giant they have become. Lying about rates, switch an bait,slow payment processes so they can send you to collections, an a host of other dirty tricks this company frankly sucks. I've met a single employee that was happy well untill they left the tyrannical absurtiy of their employment there.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Daryl Ducharme

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The United States used to represent efficiency and the ability to get things done. It also once stood for the protection of the first amendment. The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward. This merger does not support innovation or effectiveness in our communications industry. We are falling far behind other countries in our personal and business sectors because of these kinds of conglomerates. Please do not support or allow this merger.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Edward Safford

RE: MB Docket No. 14-57, Comcast-Time Warner merger

We have some of the worst, slowest, and most expensive internet costs of any advanced nation because of a lack of competition. This merger will make the situation drastically worse and that will make international competitiveness, educational opportunities, social services, and equity drastically worse. The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Carol Balla

RE: MB Docket No. 14-57, Comcast-Time Warner merger

This merger is 180 degrees of what the FCC should be doing. The FCC should be promoting competition, not destroying it. As is, Comcast and Time Warner have illegally colluded under the Sherman Act to create territorial monopolies across the U.S. Now the FCC wants to allow these two monopolies to merge? This betrayal of the American consumer is detestable. Step one, stop this merger immediately. Step two, work with the DOJ and AG to bring anti-trust lawsuits against these companies.

Sincerely,

Derek Onysko

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

I am a Netflix subscriber and refuse to have my rights to watch what I want to watch taken away by a money hungry greedy company. We don't subscribe to cable because there is nothing but trash on there as it is. We pay for our Wi-Fi and Netflix and enjoy the right to choose what we want to watch and when we want to watch it. Maybe these companies need to pay attention to homes that don't want their overpriced trash and piss poor customer service in their homes!!!!

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward. This area should be designated a UTILITY and protected against huge conglomerates that are looking to add to their bottom lines. Constant up-charges, and dealing with their customers like they do not 'count' has to stop. I have paid, illegally, more money to Comcast for THEIR mistakes than I care to go in to at the moment -- but it's in the hundreds -- just over the past few months. I don't have a land line (but I was paying for one) and I don't have a bundle that includes this -- talking to people -- OVERSEAS -- who can READ the English language, but don't understand it -- who say they will ask for an 'investigation' (that NEVER HAPPENS, by the way) is a despicable and totally underhanded way of doing business. I'm disgusted. Let this happen and they'll lose -- their customers, their bottom line and what's left of their 'Big Business' mentality !!

Sincerely,

Michele Heidt

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

RE: MB Docket No. 14-57, Comcast-Time Warner merger

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

David Brayfield
